# How it works?

How DoorVaani.com system works is explained as 1, 2, 3 in this document using flow charts and diagrams.

1. Customer registers an account and creates a VOIP Line(SIP Account).
2. User enters VOIP Line credentials (SIP Account username and password) in a SIP Device.
3. User makes and receives VOIP Calls through the SIP Device (soft-phone or IP Phone or ATA or IP-PBX or Mobile App).

Step 1: Account registration and VOIP Line (SIP Account) creation on DoorVaani.com.

Step 2: Set up SIP Device (Soft-phone or IP Phone or ATA or IP-PBX or Mobile Phone App) with VOIP Line (SIP Account) Credentials from Step 1 above.

| ATA | IP Phone | Soft Phone | Mobile App | IP-PBX |

Step 3: Make and receive VOIP Calls through the SIP Device.
